GENERAL INFORMATION

FIRST CHOICE BREAK-THRU@SUPER PENETRANT is a new patented organo silicone surfactant. It is a highly effective nonionic penetrant. Its effectiveness can allow for the use of the lowest pesticide rate. FIRST CHOICE BREAK-THRU@SUPER PENETRANT has also demonstrated the ability to induce rainfastness. Careful observation of spray application is recommended to determine proper and efficient pesticide application. This will optimize the pesticide and surfactant load levels. Read precautionary statements carefully before use.

While FIRST CHOICE BREAK-THRU@SUPER PENETRANT has been proven to be a highly efficient surfactant; timing, weather conditions, methods of application, crop conditions, and/or mixture with other chemicals not specifically recommended are beyond the control of the seller. Therefore, the user should carefully observe spray deposits, rate efficiencies, compatibilities and effectiveness in initial application and adjust the adjuvant rates accordingly.

DIRECTIONS FOR USE:

Pesticide manufacturers may recommend a rate of nonionic surfactant to be used with their product. Follow the pesticide or active ingredient label recommendations on use of surfactant. However, if the pesticide or active ingredient label does not have a specific recommendation for surfactant use, but does not prohibit the use of a nonionic surfactant, FIRST CHOICE BREAK-THRU@SUPER PENETRANT should be applied at the rates listed below. Careful observation of spray performance in a trial application with the combination of chemicals to be applied is recommended to determine proper and efficient surfactant rates.

AS SPRAY ADJUVANT WITH INSECTICIDES, FUNGICIDES, and LIQUID FERTILIZERS:

Add 4-8 ounces of FIRST CHOICE BREAK-THRU@SUPER PENETRANT per 100 gallons of spray solution.

AS SPRAY ADJUVANT WITH HERBICIDES, DEFOLIANTS and PLANT GROWTH REGULATORS:

Add 6-13 ounces of FIRST CHOICE BREAK-THRU@SUPER PENETRANT per 100 gallons of spray solution. Use higher rates for more difficult-to-control weed species.

AERIAL APPLICATIONS:

Add 12-16 ounces of FIRST CHOICE BREAK-THRU@SUPER PENETRANT per 100 gallons of spray solution.

FOR BARK PENETRATION:

For bark penetration as in the application of a basal treatment or injections, add 24-32 ounces of FIRST CHOICE BREAK-THRU@SUPER PENETRANT per 100 gallons of spray solution.

NOT FOR AQUATIC USE

MIXING INSTRUCTIONS:

1. Fill tank to 2/3 to 3/4 full of water. If foaming is anticipated, add an anti-foaming agent before pesticide and FIRST CHOICE BREAK-THRU@SUPER PENETRANT.
2. Add pesticide as directed by pesticide label.
3. Continue agitation.
4. Add FIRST CHOICE BREAK-THRU@SUPER PENETRANT and continue filling tank while maintaining agitation.

CONDITIONS OF SALE LIMITATION OF LIABILITY AND REMEDIES WESTERN FARM SERVICE, INC.

Conditions of sale and limitations of liability and remedies. Insufficient control of pests and/or injury to the turf or crop areas to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions, the failure to follow the label directions or good application practices, all of which are beyond the control of the seller.
